

Drinking Water Week

Water is vital to almost every aspect of life. It's a main ingredient in nearly every product. It's the original source of refreshment and hydration.

The Longview Water Utilities is joining in the nationwide celebration of the American Water Works Association **Drinking Water Week, May 4-10, 2014 "What do you know about H₂O?"** For more than 35 years the American Water Works Association and its members have celebrated Drinking Water Week-a unique opportunity for both water professionals and the communities they serve to join together in recognizing the vital role water plays in our daily lives. Please join the Longview Water Utilities and AWWA as we celebrate our drinking water during the week of May 4 through 10!

During the week, citizens will be encouraged to learn the importance of our safe and reliable water supply available here in Longview. The Water Utilities has been recognized for great tasting water on numerous occasions by the Texas Water Utilities Association. Longview's drinking water has won several regional and state awards, including selection as the "*Best in Texas*" on four occasions.

Throughout the week the Water Utilities department will be distributing information about Longview's water quality, water conservation tips, toilet leak detector kits and other useful consumer information.

Join us during the week for more information and give aways! Please look for more information about Drinking Water Week on CityView Municipal Television.
